

Our team in Mexico has been approached by a Mexican contractor which is very interested in identifying a UK pipeline operator with proven experience, with a view to potential partnering on a CENAGAS tender.

(CENAGAS is the equivalent of the National Grid, managing around 8,000 km of pipeline for which they intend to tender operation and maintenance services.)

At present we are aware of the following opportunities:

E-76	Maintenance and Operation for system in pipeline: 6" x 192 km <i>Venta de Carpio - Minera Autlan</i> , and Pipeline for 48" x 379.556 km <i>Cempoala-Santa Ana</i> .
E-77	Pipeline maintenance and Operation in 3 systems: 8" x 103.345 km <i>mescalon -Quimica del Rey</i> , 8" x 100.439 km, <i>Terminal Avalos - Celulosa Anáhuac</i> , 16" x 261.894 <i>Chávez - Durango</i> .
E-78	Pipeline maintenance and Operation in 3 systems: Pipeline 16" x 339.66 km <i>Naco - Hermosillo</i> , Gasoducto de 16" x 17.0 km <i>Hermosillo – Industrial park Hermosillo</i> and pipeline 8" x 8.485 km <i>Cananea - Mexicana Cananea</i> .
