

MAIN STAGE

10:00	10:15	Simon Gray + Minister Kwarteng	EEEGR	Opening Address
10:15	11:00	Melanie Onn Alistair MacFarlane Tom Greatrex Phil McNally	RenewableUK Oil & Gas Authority Nuclear Industry Association EnergyUK	A Cross Sector View of the Energy Transition. The impact of energy transition is having a different impact on the various sectors of the Energy Industry. Our speakers will outline how their respective sector will play a role in the energy transition and the challenges they may face, from skills challenges to emerging innovative technologies.

Oil & Gas Stream

11:10	12:10	Stuart Payne Martyn Tulloch Mark Goodacre	OGA OGTC Shell	Will the Energy Transition be the opportunity for the oil and gas sector to bounce back from the trading conditions and the current economic downturn? The Oil & Gas sector has been through one of its most challenging periods in its existence with the decline in oil and gas prices and impacts of Covid-19. However, despite this, at the same time operators have had to launch their net zero strategies. This session will look into how the industry is diversifying and how Oil and Gas fits into the energy transition and how the skills and knowledge of the currently oil and gas workforce can be applied to these new technologies.

Renewables Stream

11:10	12:10	Marina Valls Simon Cheeseman Cameron Witten Rob Gross	RenewableUK ORE Catapult Solar Trade Association UK Energy Research Centre	The importance of renewables and the Energy Transition in the Green Recovery In early June 2020, Alok Sharma launched a 'recovery round table' to investigate how the green transition can aid economic growth post Covid-19. Offshore Wind will play a core role in the 'Green Recovery' however there are other renewable technologies that have the potential to play their part. In this session our speakers will discuss Offshore Wind, Solar and other technologies roles in this recovery and the commitments needed from the industry to ensure the future workforce is ready.

Oil & Gas Stream

14:20	14:50	Neil Wilkinson Chris Ayres	OGTC Opex Group	Offshore Operational Emissions Reduction
15:00	15:30	Stephen Norman	DNV.GL	Opportunities for offshore Projects in East Anglia / SNS DNV GL publishes an annual Energy Transition Outlook report - an independent model of global energy demand and production mix toward mid-21st century. It affirms society's transition to a less carbon-intensive energy mix, gas dominance over oil, more renewables, and forecasts a plateau in global energy demand around 2030.

Renewables Stream

14:20	14:50	Martin Dronfield Charlie Jordan	Cluster Champion ScottishPower Renewables	A focus on the East of England Offshore Wind Cluster
15:00	15:30	Luke Wainwright Simon Gray	National Grid ESO EEEGR	Offshore Energy Integration: Meeting the target of 30GW by 2050. The UK targets for net zero by 2050 heavily rely on an increase of 30GW of offshore wind. Are regulatory and technical barriers preventing this from happening? National Grid ESO are working alongside Ofgem and BEIS to assess the most beneficial approach to integrate these necessary projects and identify potential solutions that will allow the UK to meet this challenging target.

MAIN STAGE

15:30	15:40	Simon Gray Andy Holyland	EEEGR ORE Catapult	Closing of Day 1 of SNS2020 and the announcement of the successful companies in the Fit 4 Offshore Renewables New Anglia Programme
